

## **Frontend Group 2: Portfolio website**

**Team members: Tripti Nayak**

**Shaun Figueiro**

**Sheneal butello**

**Samuel Robert**

**Problem Statement:** Create a Basic Template for Portfolio Website using React framework along with three.js library. Website should have unique way of displaying one's portfolio along with having professional guidelines. It shouldn't be having too much content, but still message should be clear. Themes should be added as well.

### **Agenda:**

- Learnt about advanced CSS.
- Explored HTML, CSS in detail.
- Explored JavaScript in basic.
- Watched videos on GitLab
- Added some members to the repository.
