

## **Frontend Group 2: Portfolio website**

### **Team members:**

**Tripti Nayak**

**Shaun Figueiro**

**Sheneal butello**

**Samuel Robert**

**Problem Statement:** Create a Basic Template for Portfolio Website using React framework along with three.js library. Website should have unique way of displaying one's portfolio along with having professional guidelines. It shouldn't be having too much content, but still message should be clear. Themes should be added as well.

### **Agenda:**

- Learnt about more advanced concepts of CSS.
- Learnt more in depth about how to create a website on React
- Prepared basic HTML and CSS template for the website design.
- Looked into more web designs for Portfolio websites.
