Frontend Group 2: Portfolio website

Team members:

Tripti Nayak

Shaun Figueiro

Sheneal butello

Samuel Robert

Problem Statement: Create a Basic Template for Portfolio Website using React framework along with three.js library. Website should have unique way of displaying one's portfolio along with having professional guidelines. It shouldn't be having too much content, but still message should be clear. Themes should be added as well.

Agenda:

- Learnt about more advanced concepts of CSS.
- Watched a video on using React to create a website.
- Prepared basic HTML and CSS template for the website design.
